

## Product Manager Job Description

Nov 2020

Skand is looking for a motivated team player who is interested to join as a member of the Product team and work on defining the next generation of Skand's experiences. Skand's software helps companies capture, analyse, and scale insight driven outcomes for their physical assets. If you are looking to learn what hands on product management work is and to work in a fast-paced, dynamic startup this is the role for you!

### The Product Manager work will focus on:

- You will develop new product ideas and experimentation plans via brainstorming, market research, customer interviews, discovery processes, and competitive analysis
- You will create detailed product requirements of new features while building and maintaining features for the Skand platform
- Work closely with R&D, Data and Go-To-Market teams in order to bring product requirements into implementable design and definitions
- Work closely with the Product Designers to define style and design that aligns with the user experience
- Translate concepts to wireframes, mockups, prototypes, and detailed design specifications
- Research competition and key product initiatives

### Requirements:

- +2 years experience in Building products, preferably in the SaaS B2B space.
- Excellent written and verbal communication skills
- Strong execution of qualitative and quantitative analysis
- You are a team player with the ability to thrive in a fast-paced, startup environment
- High degree of creativity and drive
- Bachelor's Degree in relevant field
